

DYMIND

Disposable Sampler

Thoughtfully meet various kinds of sampling needs

The Disposable Sampler is used for the collection, transportation and storage of novel coronavirus, influenza and avian influenza virus samples for subsequent extraction and amplification.

SAFER

Use high quality sample tube to prevent leakage, equipped with sterile flocking swabs, ensure biosafety.

The sample tube has no toxicity on the sample, resistant to static extrusion, dynamic impact, centrifugal and shock, maintain good shape under high temperature and pressure and low temperature environment.

CONSIDERATE

Adopt humanized breakable design for the swabs, improve convenience.

Unique scoreline design on swab rods, easy to broken without any tiny debris for specimens preservation.

Thoughtful

Pharyngeal swabs and nasal swabs available, thoughtfully meet various kinds of sampling needs.

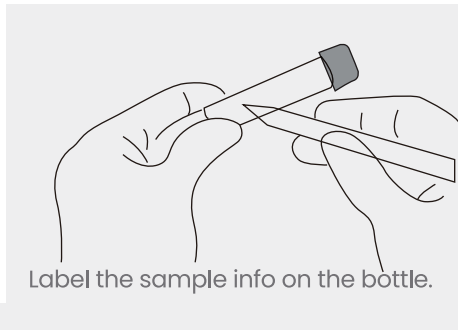

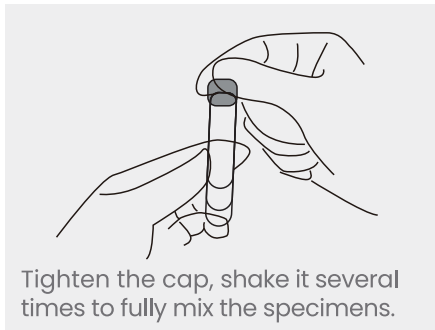

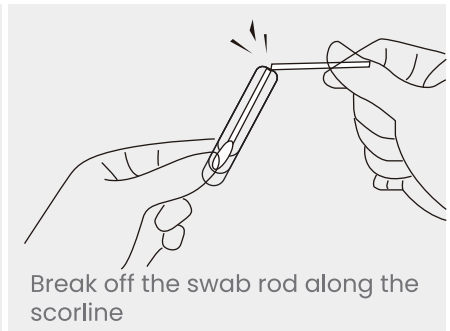

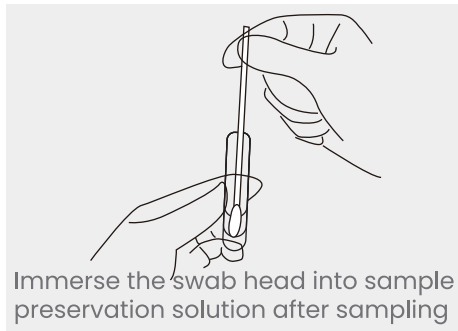

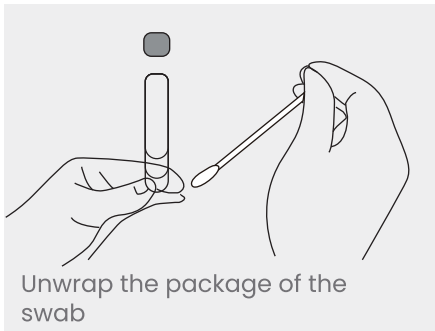

Non inactivated and inactivated sample preservation solution optional, support different clinical or experiment uses.

High quality

Using high quality sterile flocking swab, higher sample collection and release rate;

Virus preservation solution protect the stability of viral nucleic acid from degradation, greatly improve the extraction efficiency of nucleic acid.

DISPOSABLE SAMPLER USER GUIDE

SPECIFICATIONS

Products	Type	Swab	Specifications
Disposable Sampler	Inactivated/Non Inactivated	Pharyngeal swab	Pharyngeal swab*1; Sample Preservation Solution 3ml*1
		Nasal swab	Nasal swab*1; Sample Preservation Solution 3ml*1
		Pharyngeal and Nasal swabs	Nasal swab*1; Pharyngeal swab*1; Sample Preservation Solution 3ml*1
		Sample Preservation Solution	3ml*1
